## Cycle de vie du coquelicot

### Coupe longitudinale d'une graine de haricot observée à la loupe binoculaire

	<p><b>Le développement des végétaux</b></p> <p>1/20</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>A</th> <th>DF</th> <th>DD</th> <th>NA</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <p>12. Quels sont les deux éléments dont une graine a besoin pour pouvoir germer ?</p>	A	DF	DD	NA				
A	DF	DD	NA						

**8** Complète le texte.

D'abord, il y a la ..... de la graine. Les ..... puis, la ..... et les ..... se développent. Ensuite, les ..... apparaissent. Après leur ..... par les abeilles, elles donnent naissance à des ..... qui confirennent la .....

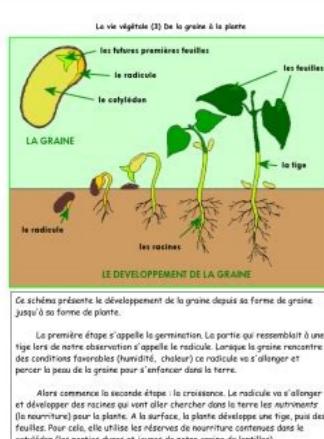

**9** Vrai ou faux ? Réponds aux questions en coloriant la bonne réponse.

La plante utilise ses fleurs pour respirer.

Le jour, la plante rejette de l'oxygène.

Les racines transportent les matières nutritives dont la plante a besoin.

Sans lumière, une graine ne peut pas germer.

THE SEED NEEDS WATER TO GERMINATE. THE SEED DOES NOT NEED LAND TO GERMINATE.! ! This is what we call *the seed needs water*. And if the seed germinates, maybe she has everything there that is necessary to germinate of which a *seed needs heat*... THE SEED NEEDS HEAT TO GERMINATE. The colonization of the seed by the virus Chapter 2: *how do you settle in an environment?* To sprout, the seed needs heat and moisture (but without earth and light). In their living environment, seeds germinate when conditions are favorable, in spring: for *no rain and return of the sun (heat source)*. Seeds may sprout only under certain conditions: hot and humid. SEEDS DO NOT NEED LIGHT TO GERMINATE. - Seeds that do not have *water* do not germinate: THE SEED NEEDS WATER TO GERMINATE. Evolution of experience You take a glass pot in which you put earth and several seeds (of lens), water and put the pot on a radiator near a lamp and/or a fan. and then don't wait for the spring light to germinate... there's no radiator in the closet...) - to go and remake the mortgage: "I think to germinate the seed needs rain/water", you have to make the experience "without water", so do not water the seed... If the seed needs the water to sprout, it must be put with *water and without water*, maybe *sprout without water*. I think The seeds are the origin of the population of the mezzo A/ Observation d'A *a bean seed From Madame LE WALES (Collage St Apolline - CourDomenica (95))* on 15 March 2020, 20:55 - siximes - Permanent Link How to explain that Germina only next spring? So our seed has the ground, the heat of the radiator, light of the lamp or the sun through the glass and water. What are the seeds expected to sprout? If our seed does not sprout, there is something missing or there is something too ... the embryo does not need to get out of the seed, it has everything there<sup>2</sup> it needs in the seed: the cotilon don ... - a Check the hypothesis: "I think of sprouting the seed needs the earth", you have to do the excitement without land, in putting the seed in the dish without anything (or cotton, but in nature the seed is very well without cotton. ...) Schafamization of experiences: there are a number of differences between CHS renze and my design: drawing colors draw an interdites red = hot / blue = water etc. the vessels are then germinated: pot "with everything" (water + heat + light + earth) pot "without light" (so Surrounded in aluminum) pot "without water" (therefore not watering) pot "wetland" (with nothing or cotton) and a plate" at the release of the refrigerator experience: - the seeds that were without heat, The refrigerator, did not sprout: the seed needs heat to sprout. And that the water was therefore not necessary | But was suspicious ... - We always have to do a technical manipulation to check if the test parameter had an influence or not. Please try the latest version of Mozilla Firefox. In the seed there is an embryo and food (called the cotil). If you think this is a mistake, please report Per risolvere Questo problema, le ipoteche proposte ci sono spesso le seguenti: Penso che per germogliare il seme abbia bisogno di: sole fonte di calore - for the mortgage *I think that to sprout the seed needs: sun source of light*, you have to do the experiment "without light", so you have to wrap the aluminum jar, or put the jar in a box He's shoes and leave this vase on the radiator (The solution of the vase in the closet raises concern of the source of heat... In order to know what is really necessary to The seed, after having made an experience OAI we have put all the conditions to make the seed germinate, we need to start the experience again by removing an element, a paramet, a mortgage: - for the mortgage *I think that to germinate the seed needs: sun heat source*", we need to make the experience "without heat", "without then put the pot with the seed to the fridge.... What do seeds need to germinate? - Seeds which had no soil, and which were without anything in the pot or on the cotton, have sprouted: THE SEED DOES NOT NEED SOIL TO germinate. What are the modes of reproduction of vehicles? But at that point, you were expected to... We are sorry but it seems that PeerTube is not compatibility with your web browser. - The seeds that have not seen the light have sprouted, when you remove the aluminum from the pot, the seeds of the pot have sprouted: THE SEED DOES NOT NEED LIGHT TO germinate. GERMINATE.
